World Population Prospects: The 2012 Revision.

Crude net migration rate: The ratio of net migration during the year to the average population in that year. Total population at end of period: Total population on 30 June of the final year of the period. Data are from the medium variant (see below) of the World Population Prospects. **Source**: United Nations, Department of Economic and Social Affairs, Population Division (2013). World Population Prospects: The 2012 Revision.

Medium variant: The medium projection variant combines the medium fertility assumption together with normal-mortality and normal international migration assumptions and is a central reference for trends over the longer term that results from the probabilistic approach that simulates future fertility paths for each country. **Source**: United Nations, Department of Economic and Social Affairs, Population Division (2013). World Population Prospects: The 2012 Revision.

Zero-migration variant: Under this assumption, the medium variant is modified so that international migration for each country is set to zero starting in 2010-2015. **Source**: United Nations, Department of Economic and Social Affairs, Population Division (2013). World Population Prospects: The 2012 Revision.

Life expectancy at birth: Number of years a newborn infant could expect to live if prevailing patterns of age-specific mortality rates at the time of birth stay the same throughout the infant's life. **Source**: United Nations, Department of Economic and Social Affairs, Population Division (2013). World Population Prospects: The 2012 Revision.

Adult literacy rate: The percentage of population aged 15 years and older who can both read and write with understanding a short simple statement on his/her everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. **Source**: United Nations Educational, Scientific and Cultural Organization. Combined gross enrolment ratio in education: Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year. For the tertiary level, the population used is that of the five-year age group following on from the secondary school leaving. **Source**: United Nations Educational, Scientific and Cultural Organization. Institute for Statistics (2012). <http://stats.uis.unesco.org>

GDP per capita (PPP in USD): Gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars. **Source**: World Development Indicators - World Bank (2013).

Human development index (HDI): A composite measure of achievements in three basic dimensions of human development—a long and healthy life, access to education and a decent standard of living. For ease of comparability, the average value of achievements in these three dimensions is put on a scale of 0 to 1, where greater is better, and these indicators are aggregated using geometric means. **Source:** United Nations Development Program (2013). Human Development Report Office.

Remittances: Remittances are defined as the sum of workers' remittances, compensation of employees, and migrants' transfers. Regional aggregates were calculated by the United Nations Population Division. All data are reported in current U.S. dollars. Remittance **inflows** refer to the sum of workers' remittances, compensation of employees and migrants' transfers received by the country of enumeration, while **outflows** refer to remittance outflows by the country of enumeration. **Source:** World Bank staff calculation based on data from IMF Balance of Payments Statistics Yearbook 2012 and data releases from central banks, national statistical agencies, and World Bank country desks.
